ASSOC.; PRIEST LAKE
TRAILS/OUTDOOR
RECREATION ASSOC.; WINTER
RIDERS INC., an Idaho
Corporation, aka SANDPOINT
WINTER RIDERS; PRIEST LAKE
CHAMBER OF COMMERCE; THE
AMERICAN COUNCIL OF
SNOWMOBILE ASSOCIATIONS;
and THE BLUERIBBON
COALITION,

Defendant-Intervenors.

NO. CV-05-248-RHW

**ORDER GRANTING
PLAINTIFFS' MOTION FOR
PRELIMINARY INJUNCTION**

Before the Court is Plaintiffs' Motion for TRO and/or Preliminary

1 Injunction¹ (Ct. Rec. 35). Plaintiffs seek immediate injunctive relief prohibiting
2 Defendant USFS from implementing their “Challenge Cost-Share Agreement” for
3 snowmobile trail grooming in certain areas of the Idaho Panhandle National Forest
4 during the winter 2005-06, to protect the endangered Selkirk Mountains woodland
5 caribou. For the reasons stated below, the Court grants Plaintiffs’ motion.

6 BACKGROUND

7 Plaintiffs challenge the biological opinions issued by Defendants Martin and
8 the U.S. Fish and Wildlife Service (“FWS” or “Service”) and actions by
9 Defendants McNair and U.S. Forest Service (“USFS”) in violation of the
10 Endangered Species Act (“ESA”), 16 U.S.C. § 1536. The complaint alleges
11 Defendants are allowing the decline of the remaining woodland caribou in the
12 continental United States by implementing National Forest management actions.

13 In their first cause of action, Plaintiffs challenge the Service’s 2001
14 Amended Biological Opinion finding that the continued implementation of Forest
15 Plans will cause “no jeopardy” to the caribou in the Colville and Idaho Panhandle
16 National Forests. Plaintiffs claim this finding was arbitrary and capricious in
17 violation of the ESA and the Administrative Procedure Act (“APA”), 5 U.S.C. §
18 701, because it was contrary to the Service’s own research and analysis
19 demonstrating that the continued implementation of these plans was contributing to
20 the decline of the woodland caribou by allowing the intrusion of snowmobile
21 activities into caribou habitat.

22 For their second cause of action, Plaintiffs allege the Service arbitrarily and
23

24 ¹ The parties came to an agreement on Plaintiffs’ Motion for a Temporary
25 Restraining Order, so the matter currently before the Court is a motion for a
26 preliminary injunction only. The agreement reached restricted snowmobile
27 grooming on certain trails for a limited time and eliminated the need for a
28 temporary restraining order.

1 capriciously concluded that the “Incidental Take” statements in the Biological
2 Opinions would not jeopardize the caribou’s continued existence, in violation of
3 the ESA and the APA, 5 U.S.C. § 701. Specifically, Plaintiffs state that the
4 Incidental Take Statements are not based on the best available scientific
5 information as required by the ESA, and further that they are arbitrary and
6 capricious, an abuse of discretion, and contrary to law. Plaintiffs claim these
7 statements unlawfully authorize the unlimited “Incidental Take” of caribou in the
8 implementation of the Forest Plans.

9 Plaintiffs’ third cause of action charges Defendant USFS with violating the
10 ESA’s consultation and other requirements. Plaintiffs assert USFS allows the
11 displacement and harassment of caribou from their necessary habitat by promoting
12 snowmobiling in their management of the National Forest Service lands, and thus
13 violates the ESA. Specifically, Plaintiffs challenge the failure to reinitiate
14 consultation after USFS failed to develop a recreational management plan as
15 required by the Service’s 2001 Biological Opinion for the Idaho Panhandle
16 National Forest. Plaintiffs also challenge USFS’s failure to consult when entering
17 the Challenge Cost-Share Agreement, which Plaintiffs claim authorizes, promotes,
18 and manages motorized winter recreation on the Idaho Panhandle National Forest.²
19 Plaintiffs claim Defendant USFS violates its duties under the ESA to conserve the
20 woodland caribou by failing to consult with the Service over the effects of
21 snowmobiling and failing to create a plan to minimize the adverse impact on the
22 endangered species.

23 The Court granted Defendant-Intervenors’ permissive intervention by order
24 on November 7, 2005 (Ct. Rec. 34). Defendant-Intervenors consist of recreational
25 groups (mostly snowmobiling groups) of two varieties: those with national
26

27 ² The Challenge Cost Share Agreement is the subject of Plaintiffs’ current
28 motion for a preliminary injunction.

1 memberships and those with a local focus. Defendant-Intervenors (“Intervenors”)
2 levy the following cross-claims in their answer (Ct. Rec. 10-3): (1) the closure of
3 the Selkirk Crest is illegal under the National Forest Management Act (“NFMA”)
4 and arbitrary and capricious under the APA; (2) Defendants’ Biological Opinions
5 are arbitrary and capricious under the APA; and (3) Defendants have failed to
6 conduct mandatory management action by prolonging a “temporary” closure to
7 vehicles. Intervenors ask the Court to dismiss Plaintiffs’ claims for relief, declare
8 unlawful and set aside Defendants’ restrictions on access to the Selkirk Crest,
9 declare unlawful and set aside the Biological Opinions, and compel Defendants to
10 initiate and complete management processes.

11 **FACTS**

12 **I. Snowmobiling and its Effects on the Woodland Caribou**

13 The Selkirk Mountains woodland caribou is listed as “endangered” under the
14 ESA. 50 C.F.R. § 17.11. Its remaining population numbers about 33-35 animals,
15 with most of the population located in southern British Columbia and a few found
16 in northern Idaho. In its 2001 Amended Biological Opinion, the Service
17 recognized that this population “is considered to be in decline and in danger of
18 extirpation.” Intervenors correctly assert that only a few caribou are likely to be
19 found anywhere south of the Canadian border—the Idaho Fish and Game
20 Department has found one to three caribou in several different areas of the Selkirk
21 Mountains during surveys of northern Idaho over the last five years.

22 The winter habitat of the woodland caribou consists generally of high
23 elevation areas, where they walk on top of the snow and feed on nutrient-poor
24 lichen found above the snowline on mature and old-growth trees. There are
25 groomed trails and snowmobile “play areas” throughout the Selkirk Mountains,
26 including areas close to potential caribou habitat. In its Idaho Panhandle National
27 Forest (“IPNF”) 2001 Amended Biological Opinion, the Service states “[t]here is
28 limited information on the effects of winter recreation on woodland caribou;

1 however, it is known that snowmobile use in winter habitats can displace caribou
2 from important habitats or preclude their use of such habitat.” USFS closed a 25-
3 square-mile area to snowmobile access in 1994 to assist in caribou recovery.

4 Approximately 251 miles of snowmobile trails occur in the caribou recovery
5 area within the IPNF every winter, 77 miles of which are groomed trails, and over
6 50,200 acres of play areas exist within the caribou recovery zone. An additional
7 791 miles of snowmobile routes exist in the Selkirks region outside the IPNF,
8 including an additional 486 miles of groomed trails and another 125,000 acres of
9 play areas. Many businesses, particularly in the Priest Lake region, rely heavily on
10 revenues from snowmobile-related visits to the area.

11 **II. Fish & Wildlife Service’s 2001 Amended Biological Opinion**

12 The Service’s 2001 Amended Biological Opinion (“BiOp”) for the IPNF
13 approved the 1987 Panhandle National Forest Plan, finding that any “take” of
14 woodland caribou within the IPNF is “incidental to and not intended as part of the
15 agency action . . . provided that such taking is in compliance with this Incidental
16 Take Statement.” The Incidental Take Statement’s terms and conditions for
17 woodland caribou include a non-discretionary requirement that USFS by January
18 2004 “develop and implement a comprehensive recreation strategy which identifies
19 specific standards and restrictions necessary to protect caribou and their habitat on
20 the IPNF.” USFS has neither developed nor implemented such a strategy. The
21 Service found a strategy was necessary because

22 [w]inter recreation, particularly snowmobiling, is quickly becoming a
23 significant threat to caribou, both through direct harassment and
24 indirectly by potentially precluding caribou use of historic habitats and
25 travel corridors. Snowmobile activity continues to rapidly expand
26 throughout caribou habitat, and the existing standards are not specific
27 enough to clearly address this growing problem. Protection of suitable
28 habitat and travel corridors is essential to ensure that caribou have
unrestricted access to available habitat.

(2001 Am. BiOp, at 53).

USFS did issue a “Situation Summary and Management Strategy for

1 Mountain Caribou And Winter Recreation on the Idaho Panhandle National
2 Forests” (“Situation Summary”) in March 2004. However, this does not include a
3 “strategy that clearly defines where recreational activities are appropriate and
4 inappropriate to ensure the protection of caribou habitat effectiveness and
5 minimize the potential for direct effects on individual caribou” as the Incidental
6 Take Statement requires. (2001 Am. BiOp, at 68). Instead, the Situation Summary
7 explains that “[t]his caribou winter recreation strategy . . . does not result in
8 management decisions that change the current condition or policies. The analysis
9 that may result in access changes will be incorporated into the Forest Plan
10 revision.”

11 Assuming USFS had timely developed and implemented a compliant
12 strategy, the Incidental Take Statement still cautions that “the Service is not able to
13 issue a ‘blanket’ incidental take statement with a comprehensive list of reasonable
14 and prudent measures to sufficiently cover all programs and actions subsequently
15 implemented pursuant to the Forest Plan. Individual actions that may result in take
16 of woodland caribou will be subject to future site-specific consultation.” (2001
17 Am. BiOp, at 59-60).

18 **III. The Challenge Cost-Share Agreement**

19 The Idaho Department of Parks and Recreation, Bonner County, and the
20 USFS/IPNF entered into the Challenge Cost-Share Agreement (“Agreement”) in
21 March 2004. The parties state in the Agreement that they “have a mutual desire to
22 work together in promoting and maintaining the snowmobile recreation program”
23 in certain designated areas, including areas within IPNF. USFS agrees among
24 other things to meet with the other parties to develop annual operating plans and
25 financial plans; authorize, “in accordance with applicable Federal requirements,”
26 forest system lands to be used in the snowmobiling and grooming program;
27 provide assistance, funds, and personnel to aid the grooming program as funds and
28 regulations allow; perform off-season maintenance; and monitor the routes to

1 ensure grooming is occurring. The annual operating plan includes at a minimum
2 designated grooming routes and parking areas, among other requirements.

3 USFS has never conducted an ESA Section 7 consultation with the Service
4 regarding the IPNF Challenge Cost-Share Agreement. Defendants assert that the
5 Agreement is not a license for snowmobiling and/or trail grooming in the IPNF;
6 rather, they submit that it serves “primarily” as a funding agreement whereby costs
7 normally born by the Federal government are shared by mutually interested parties.
8 Defendants state that the authorization for trail grooming and snowmobiling
9 predates the Agreement—that it was approved when the 2001 BiOp was issued,
10 and thus the Agreement does not require any additional Section 7 consultation.
11 Plaintiffs counter that although the Forest Plan and the 2001 BiOp address
12 snowmobiling in general, the Agreement is the only document that discusses trail
13 grooming. Plaintiffs maintain that trail grooming was not an activity analyzed in
14 the 2001 BiOp.

15 JURISDICTION & STANDARD OF REVIEW

16 Citizens and citizen groups are authorized under the ESA to file suit “to
17 enjoin any person, including the United States . . . who is alleged to be in violation
18 of any provision of this chapter or regulations issued under the authority thereof.”
19 16 U.S.C. § 1540(g)(1). Federal district courts have jurisdiction to enforce “any
20 such provision or regulation.” *Id.*

21 The usual standard for granting a preliminary injunction “balances the
22 plaintiff’s likelihood of success against the relative hardship to the parties.” *Clear*
23 *Channel Outdoor Inc. v. City of Los Angeles*, 340 F.3d 810, 813 (9th Cir. 2003).
24 To obtain a preliminary injunction, Plaintiffs must demonstrate “either (1) a
25 likelihood of success on the merits and the possibility of irreparable injury; or (2)
26 that serious questions going to the merits were raised and the balance of hardships
27 tips sharply in [their] favor . . .” *Id.* These standards are not separate tests; rather
28 they are along the same continuum. *Id.* Therefore, the greater the relative hardship

1 to the party seeking the injunction, the less probability of success must be shown.
2 *Id.*

3 By enacting the ESA, Congress altered the normal standards for injunctions
4 under Federal Rule of Civil Procedure 65. The Ninth Circuit has consistently held
5 that “[t]he traditional preliminary injunction analysis does not apply to injunctions
6 issued pursuant to the ESA.” *Nat’l Wildlife Fed’n v. Nat’l Marine Fisheries Serv.*,
7 422 F.3d 782, 793 (9th Cir. 2005). The Supreme Court stated that in enacting the
8 ESA “Congress has spoken in the plainest of words, making it abundantly clear
9 that the balance has been struck in favor of affording endangered species the
10 highest of priorities.” *TVA v. Hill*, 437 U.S. 153, 194 (1978). “Accordingly, courts
11 may not use equity’s scales to strike a different balance.” *Nat’l Wildlife Fed’n*, 422
12 F.3d at 794 (internal quotation omitted).

13 “The remedy for a substantial procedural violation of the ESA—a violation
14 that is not technical or *de minimus*—must therefore be an injunction of the project
15 pending compliance with the ESA.” *Wash. Toxics Coalition v. EPA*, 413 F.3d
16 1024, 1034 (9th Cir. 2005) (upholding an injunction prohibiting the EPA from
17 authorizing the use of certain pesticides within proscribed distances of salmon-
18 bearing waters until it had fulfilled its consultation obligations under Section
19 7(a)(2) of the ESA). To show they are entitled to a preliminary injunction due to a
20 violation of the ESA, Plaintiffs must “make a showing that a violation of the ESA
21 is at least likely in the future.” *Nat’l Wildlife Fed’n v. Burlington N. R.R., Inc.*, 23
22 F.3d 1508, 1511 (9th Cir. 1994). Plaintiffs argue that the circumstances of the
23 woodland caribou in this case require the Court to take particular care, stating that
24 “[t]emporary harms” during the consultation process “could lead to the permanent
25 harm of extinction.” *Defenders of Wildlife v. U.S. Env’tl. Protection Agency*, 420
26 F.3d 946, 978 (9th Cir. 2005) (discussing potential harms to pygmy owl, which
27 records suggest numbers less than 100 in area under consideration; court discussed
28 this in its decision regarding what remedy to impose after finding agency action

1 arbitrary and capricious, not in context of motion for preliminary injunction).

2 **DISCUSSION**

3 Plaintiffs seek immediate injunctive relief prohibiting Defendant USFS from
4 implementing their “Challenge Cost-Share Agreement” for snowmobile trail
5 grooming on the IPNF during the winter 2005-06, to protect the endangered
6 Selkirk Mountains woodland caribou. Plaintiffs are not requesting an injunction
7 ordering cessation of all snowmobiling in the IPNF; instead it appears they request
8 the Court to enjoin the grooming of certain trails within the IPNF.

9 **I. Section 7(a)(2) of the ESA**

10 Section 7(a)(2) of the ESA provides: “Each Federal agency shall, in
11 consultation with and with the assistance of the Secretary, insure that any action
12 authorized, funded, or carried out by such agency . . . is not likely to jeopardize the
13 continued existence of any endangered species or threatened species” 16
14 U.S.C. § 1536(a)(2). “Jeopardize” means to “reduce appreciably the likelihood of
15 both the survival and recovery of a listed species in the wild by reducing the
16 reproduction, numbers, or distribution of that species.” 40 C.F.R. § 402.02.

17 An “agency action” under Section 7 of the ESA encompasses “all activities
18 or programs of any kind authorized, funded, or carried out, in whole or in part, by
19 Federal agencies in the United States” including “the granting of licenses,
20 contracts, leases, easements, rights-of-way, permits, or grants-in-aid.” *Id.*
21 “Section 7 and the requirements of this Part apply to all actions in which there is
22 discretionary Federal involvement or control.” *Id.* § 402.03.

23 The Supreme Court and the Ninth Circuit have interpreted “agency action”
24 broadly. *Pacific Rivers Council v. Thomas*, 30 F.3d 1050, 1054-55 (9th Cir. 1994)
25 (citing *TVA v. Hill*, 437 U.S. at 173). Where the agency retains ongoing decision-
26 making authority or control over the action, it has a continuing obligation to follow
27 the requirements of the ESA. *Wash. Toxics Coalition*, 413 F.3d at 1033 (holding
28 that EPA had ongoing discretion over registration of pesticides and thus had a

1 continuing obligation to consult over those registrations); *Turtle Island Restoration*
2 *Network v. NMFS*, 340 F.3d 969, 974 (9th Cir. 2003) (holding that fishing permits
3 were ongoing agency actions because they entailed ongoing and lasting effects and
4 the agency had discretion to condition them to protect listed fish species).

5 **II. Is the Challenge Cost-Share Agreement an Agency Action?**

6 Plaintiffs contend that the Agreement at issue here falls squarely within this
7 definition of “agency action,” and thus USFS was required to consult with the
8 Service under Section 7 of the ESA. Under the terms of the Agreement, USFS
9 does retain both control and “discretion to act.” *Turtle Island*, 340 F.3d at 974. By
10 its terms, the Agreement commits USFS to authorize the use of IPNF lands,
11 consistent with applicable Federal requirements, for “snowmobiling and the
12 grooming program.” Defendants and Intervenor insist the Agreement is not an
13 agency action. Instead, they assert it is a funding agreement, and they point to the
14 language describing the purpose of the Agreement: “to document the cooperation
15 among the parties for the groomed snowmobile trails program within the
16 boundaries of State Designated Snowmobile Areas #9A and 9B in Bonner
17 County.” Defendants and Intervenor assert that the language of the Agreement
18 shows implicitly that it simply recognizes the “snowmobile trail grooming
19 program” as an existing program already in place.

20 However, even if this authorization existed previously, the Agreement
21 memorializes that it is a continuing obligation. The current Agreement’s similarity
22 to past agreements does not mean it is not an “agency action” under Section 7(a)(2)
23 of the ESA. *See, e.g., NRDC v. Houston*, 146 F.3d 1118, 1125 (9th Cir. 1998)
24 (*renewal* of water contracts was agency action under ESA). Particularly in light of
25 USFS’s failure to implement a comprehensive recreational strategy as required in
26 the 2001 BiOp, the Agreement appears to be the only official policy put forth by
27 USFS regarding on-going authorization of snowmobile trail grooming within the
28 IPNF. USFS maintains discretion over trail grooming by the terms of the

1 Agreement and can place conditions on its authorization. In the Situation
2 Summary issued in March 2004, USFS recognized it had this continuing obligation
3 and authority. The Situation Summary states that the rationale for continued
4 coordination with local snowmobile trail groomer committees is so the “Forest
5 Service would have a representative at scheduled grooming meetings to ensure that
6 all aspects of the grooming program on National Forest Lands meet Forest Plan
7 and other management direction.” Rule Decl. Ex. 10, at 33 (internal quotation
8 omitted). This language necessarily implies that USFS has discretion and authority
9 under the Agreement to place conditions on the grooming program.

10 The Agreement further requires USFS to participate in the grooming
11 program on an on-going basis “as appropriations and regulations allow.” During
12 fiscal year 2004, USFS committed \$8,100 to the program. Additionally, USFS is
13 committed under the Agreement to participate in the development of annual
14 operating plans prior to each grooming season. The annual operating plan must
15 include the designation of grooming routes and parking areas for snowmobile
16 access.

17 Defendants and Intervenors vigorously argue that the Agreement is not an
18 agency action, and that enjoining USFS’s participation in the agreement would not
19 stop the grooming program as it currently exists. They assert that grooming is
20 authorized through other documents (see discussion below), and that absent the
21 Agreement a private party could groom the trails and unimproved roads to aid
22 snowmobile access. In response Plaintiffs cite to the Forest Service regulation
23 prohibiting “[c]onstructing, placing, or maintaining any kind of road, trail, . . . or
24 other improvement on National Forest System lands . . . without a special use
25 authorization, contract, or approved operating plan” with exceptions not relevant
26 here. 36 C.F.R. § 261.10(a).

27 The heart of this motion is whether the Agreement actually permits USFS to
28 authorize or condition trail grooming within the IPNF. The Court finds

1 Defendants' and Intervenor's argument that grooming could freely occur without
2 specific authorization is without merit. Both the regulation cited by Plaintiffs and
3 common sense illustrate that a private individual or association could not freely
4 maintain an unimproved road on Forest Service lands without authorization of
5 some kind during the summer months. Grooming a road or trail for snowmobile
6 access in the winter is analogous to maintaining a road for vehicle access in the
7 summer. If a private group went to the IPNF with a snowcat or other grooming
8 machine intending to groom trails, the Court believes and the regulation indicates
9 that USFS could either deny them the opportunity or place conditions on their
10 planned activities by limiting where they could groom, when they could groom, the
11 size and/or type of equipment they could use, etc.

12 This discretion is implicit and explicit in the language of the Agreement at
13 issue here. The Agreement states that USFS is "authorized by Acts of Congress
14 and by regulations issued by the Secretary of Agriculture to regulate the occupancy
15 and use of National Forest System lands." It also requires USFS to "[a]uthorize, in
16 accordance with applicable Federal requirements, National Forest System lands in
17 the areas indicated in the approved [annual operating plan] to be used for
18 snowmobiling and the grooming program." Finally, the Agreement requires USFS
19 to "[m]eet with the County and the Grooming Committee to develop the [annual
20 operating plan] . . . prior to each grooming season." As mentioned above, the
21 annual operating plan must designate grooming routes and parking areas. Even if
22 the overall trail grooming program was authorized by the Forest Plan or another
23 contract or action, the Agreement memorializes USFS's continuing discretion
24 regarding trail grooming within the IPNF.

25 This conclusion is further bolstered by USFS's response to Plaintiff Selkirk
26 Conservation Alliance's request under the Freedom of Information Act. Rule
27 Decl., Ex. 34. Plaintiff requested copies of "any or all snowmobile grooming
28 permits." USFS in its reply provided a copy of the Challenge Cost-Share

1 Agreement. USFS's response to this request is not determinative that the
2 Agreement is a permit or an agency action, but it does show that USFS itself
3 characterized the Agreement as a permit, or at least as the closest document to a
4 permit that exists in its records.

5 The Agreement therefore meets the definition of "agency action" under
6 Section 7(a)(2). USFS maintains control over authorization of IPNF lands for trail
7 grooming under the Agreement and it has a continuing commitment to assist in the
8 development of annual operating plans under the Agreement. At the very least, the
9 Agreement qualifies as an individual action "that may result in take of woodland
10 caribou" and thus is "subject to future site-specific consultation." 2001 Am. BiOp,
11 at 59-60. Finding that entering the Challenge Cost-Share Agreement is an "agency
12 action" under Section 7(a)(2) of the ESA, the Court holds USFS's failure to
13 consult before entering the Agreement is a clear procedural violation of the ESA.
14 Because the Court must strike the balance in favor of protecting the endangered
15 species when considering a motion for preliminary injunction, an injunction
16 pending consultation with the Service is the appropriate remedy. *Wash. Toxics*
17 *Coalition*, 413 F.3d at 1034.

18 **III. Was trail grooming approved in the 2001 Amended Biological Opinion?**

19 Defendants and Intervenor argue that to the extent the Agreement
20 memorializes USFS's involvement with the trail grooming program, it does not
21 require Section 7 consultation because the trail grooming program was previously
22 authorized by the Forest Plan and approved by the 2001 Amended BiOp.³

23 _____
24 ³ Although this issue was not raised during argument, the Court notes that
25 the applicability of the 2001 Amended BiOp is questionable due to USFS's failure
26 to comply with the "non-discretionary" requirements in the terms and conditions
27 for the Service's Incidental Take Statement. These terms and conditions are
28 necessary for USFS "to be exempt from the prohibitions of section 9 of the

1 Defendants contend that the Forest Plan contains the “explicit” decision
2 authorizing snowmobiling and trail grooming within the IPNF. To support this
3 assertion, they submit the Road Management Policy from the IPNF 1987 Forest
4 Plan. The Road Management Policy states that it is USFS policy “that all roads on
5 National Forest lands shall remain open for public use unless there are sound
6 reasons in the interest of the public and/or resource protection for their closure.”
7 The Road Management Policy further states that when deciding whether to close a
8 road to public access, one of the standard criteria USFS uses to assess the decision
9 is whether the road is a groomed snowmobile trail, defined as those “roads listed in
10 Cooperative Agreement with counties and . . . identified as key roads which
11 historically have been groomed several times a year.” In support of their position,
12 Defendants submit copies of past agreements similar to the Challenge Cost-Share
13 Agreement of 2004.

14 In rebuttal, Plaintiffs assert that the Road Management Policy in the Forest
15 Plan does not establish the trail grooming program, designate the trail system, or
16 authorize the County to groom the trails within the IPNF. Therefore, Plaintiffs
17 maintain that but for the Agreement, trail grooming would not occur in the IPNF.
18 Plaintiffs mischaracterize the nature of the Agreement somewhat. The Agreement
19 does not authorize or identify areas for snowmobile access and travel. This activity
20 would occur absent USFS’s participation in the Agreement through a continuing
21 land management process. 36 C.F.R. § 295.2(a). Additionally, the evidence of

22 _____
23 [ESA].” 2001 Am. BiOp, at 61. USFS was required to develop and implement a
24 recreational strategy by January 2004 that “clearly defines where recreational
25 activities are appropriate and inappropriate to ensure the protection of caribou
26 habitat effectiveness and minimize the potential for direct effects on individual
27 caribou.” *Id.* at 68. USFS’s Situation Summary, issued in March 2004, does not
28 fulfill these requirements. *See* Rule Decl., Ex. 10.

1 prior similar agreements indicates that trail grooming was likely authorized
2 elsewhere. However, the Agreement does specifically authorize and ensure
3 continuing USFS oversight of the trail grooming program within the IPNF. This
4 continued discretionary involvement indicates that the Agreement does in fact
5 qualify as an agency action under Section 7(a)(2) of the ESA, as described above.
6 40 C.F.R. § 402.03.

7 Additionally, Plaintiffs cite two Ninth Circuit cases for the proposition that
8 site-specific or individual action consultations are necessary even when an activity
9 is generally approved in a Forest Plan. In *Gifford Pinchot Task Force v. U.S. Fish*
10 *and Wildlife Service*, 378 F.3d 1059 (9th Cir. 2004), the Ninth Circuit considered
11 challenges to six different Biological Opinions which allowed for timber harvests
12 and which relied in part on the comprehensive Northwest Forest Plan (“NFP”).
13 The court upheld the Biological Opinions because their analyses “did not rely
14 solely on the NFP, but conducted independent analyses of site-specific data.” *Id.* at
15 1067-68. In *Lane County Audubon Society v. Jamison*, 958 F.2d 290 (9th Cir.
16 1992), the Ninth Circuit determined that both a timber sales “strategy” and
17 individual sales themselves required consultation with the Service, and it enjoined
18 any further sales until those consultations were accomplished. *Id.* at 293. These
19 cases are not directly on-point, for the individual actions (timber sales) taken
20 pursuant to a larger plan were perhaps more obviously “agency actions.”
21 However, they are persuasive authority for the proposition that an overarching plan
22 containing general guidelines for future management, even if approved in a
23 Biological Opinion, does not give an agency carte blanche to perform all actions
24 pursuant to the plan without consultation under Section 7(a)(2). This conclusion is
25 supported by the Service’s own language in the 2001 BiOp requiring “future site-
26 specific consultation” for individual actions that may result in take of woodland
27 caribou.

28 Plaintiffs further point out that even if the trail grooming program is

1 authorized via the Forest Plan and not the Agreement, Defendants still failed to
2 consult over grooming because the 2001 BiOp contains no discussion about trail
3 grooming or its effects. This assertion is true for the most part. The 2001 BiOp
4 addresses general concerns about snowmobiling's effects on the woodland caribou,
5 most likely because the Forest Plan approved of snowmobiling in the abstract,
6 instead of granting specific approval for trails and play areas in particular
7 locations. The only reference to trail grooming in the 2001 BiOp occurs in its
8 discussion of the environmental baseline for woodland caribou, where it states:

9 Simpson and Terry (2000) indicate that, compared to other backcountry
10 winter recreation activities, snowmobiling represents the highest
11 potential threat because of the overlap of caribou winter range and high
12 capability snowmobile terrain. They characterize the primary concern
as displacement from late winter range, although they acknowledge that
caribou on early winter ranges may be disturbed as well, typically due to
groomed snowmobile trails.

13 2001 Am. BiOp, at 48.

14 Therefore, whether or not trail grooming in the IPNF was authorized or
15 approved in earlier documents, the Agreement memorializes USFS's continued
16 discretion to authorize and place conditions on trail grooming within the IPNF.
17 Accordingly, it is an agency action under Section 7(a)(2) which requires
18 consultation.

19 **IV. Delay**

20 Defendants and Intervenors both assert that Plaintiffs' delay in requesting
21 this injunction argues against granting it. Generally, a preliminary injunction
22 should not be issued where plaintiffs delayed seeking injunctive relief. *Lydo*
23 *Enters. v. City of Las Vegas*, 745 F.2d 1211, 1213 (9th Cir. 1984). Here,
24 Defendants and Intervenors argue that the Agreement was entered into in March
25 2004, 17 months before Plaintiffs filed this suit and 20 months before they filed the
26 present motion. Additionally, the parties submit that snowmobiling has been
27 occurring in the area since at least 1982.

28 However, the Ninth Circuit has held that laches is an appropriate defense to

1 a motion for an injunction only when the defendants can prove (1) unreasonable
2 delay in asserting a known legal right, and (2) that the delay caused prejudice.
3 *People of the Village of Gambel v. Hodell*, 774 F.2d 1414, 1427-28 (9th Cir. 1985).
4 Defendants agree that delay alone is not sufficient reason to deny injunctive relief,
5 but aver that along with other weaknesses in Plaintiffs' argument it militates for
6 denial.

7 Plaintiffs assert that they have not been "sleeping on their rights." They
8 state they have repeatedly sought to resolve their concerns through discussions
9 with USFS, and they filed this suit only when it became apparent that the
10 discussions were not going to result in any "on-the-ground changes." The Court
11 finds that Plaintiffs did not unreasonably delay in asserting their rights, nor did any
12 delay prejudice the Defendants.

13 **V. The Scope of Plaintiff's Motion**

14 Intervenor also assert that Plaintiff's original motion simply requested the
15 Court to enjoin the Challenge Cost-Share Agreement, and that permitting their
16 motion to encompass an injunction of trail grooming would be unfair and beyond
17 the scope of their motion. However, Plaintiffs filed their motion with the
18 reasonable belief, based on the language of the Agreement and USFS's response to
19 Plaintiff Selkirk Conservation Alliance's Freedom of Information Act request, that
20 the Agreement was a snowmobile trail grooming permit, or the closest thing to it.
21 The question of whether the Agreement was anything other than this was raised in
22 the first instance by Defendants and Intervenor in their response memoranda.
23 Defendants and Intervenor may not artificially limit Plaintiffs' motion through
24 their own interpretation of the Agreement.

25 The Court has found that USFS has the discretion to permit, prohibit,
26 condition, or otherwise limit its authorization for trail grooming through the
27 Agreement. Therefore, the Agreement is an agency action, and as such may be
28 enjoined in its entirety pending consultation. Plaintiffs did not expand their request

1 in their reply memorandum; rather, they refined their request, asking for an
2 injunction that is more narrowly-tailored to the activities they believe may actually
3 harm the woodland caribou and their habitat. The Court finds this narrowly-
4 tailored injunction is within the scope of Plaintiffs' original motion and appropriate
5 pending the completion of Section 7(a)(2) consultation.

6 Accordingly, **IT IS HEREBY ORDERED:**

7 1. Plaintiffs' Motion for a TRO and/or Preliminary Injunction (Ct. Rec. 35)
8 is **GRANTED**.

9 2. The grooming and plowing of designated parking areas for the following
10 trails, which are either within or provide access to the caribou recovery area, is
11 prohibited:

12 Area 9A Trails:

13 Trails 665 and 1013 from Mollie's Loop to Hemlock Loop;
14 Trails 656 and 1127 making up Hemlock Loop;
15 Trails 401 and 1015 from Hemlock Loop southeast past Boulder
16 Meadows to the junction with Trail 1341;
17 Trail 1341 from the junction with Trail 1015 south past Dusty Peak to
18 the junction with Trail 302;
19 Trail 302 from Hemlock Loop/Granite Pass south to junction with
20 Trail 1362.

21 Area 9B Trails:

22 Smith Creek Trail #281, which leaves Hwy. 45/18 and heads
23 southwest past Shorty Peak;
24 All groomed trails in the Snow Creek, Ruby Creek, Falls Creek, Pack
25 River, and Jeru Creek areas, including Trail 231 up to Harrison Lake,
26 as well as designated parking areas at the Ruby Creek, Falls Creek,
27 and Pack River trailheads.

28 3. Plaintiffs' Motion for Leave to File Excess Pages (Ct. Rec. 45) is
GRANTED.

26 ///

27 ///

IT IS SO ORDERED. The District Court Executive is directed to enter this
ORDER GRANTING PLAINTIFFS' MOTION FOR PRELIMINARY
INJUNCTION * 18

1 Order and forward copies to counsel.

2 **DATED** this 20th day of December, 2005.
